

Services Certification

Mekorma offers multiple certification paths so partners can pick what fits their team's size and schedule.

Choose Your Path

Both cover the same curriculum and lead to the same certification:

RECOMMENDED

Public Certification Webinar

BEST FOR *Individual consultants & small teams*

- ✓ Free to attend
- ✓ Scheduled monthly; fastest path for most teams
- ✓ Comprehensive, structured curriculum
- ✓ Train alongside other partners

Private Team Certification

BEST FOR *Larger teams or specific scheduling needs*

- ✓ Dedicated instructor for your organization
- ✓ Scheduled at a time that works for you
- ✓ Discussion tailored to your business scenarios
- ✓ Your whole team trains together

Note: Teams of one or two are usually best served by the public webinar. We can arrange a private session when project timelines or customer commitments call for it.

What Certification Gets You

Complete either path and your team members are recognized as **Mekorma Certified Consultants**, eligible for partner programs and implementation opportunities that require certification.

Staying Current

Mekorma evolves year-round. We recommend recertifying annually so your team stays sharp on new features, workflows, and implementation best practices — and delivers the best possible experience to customers. Certain partner programs and advanced opportunities may require current certification.

Ready to get certified?
