

Where Mekorma Fits in Business Central

Business Central Handles Transactions. Mekorma Helps AP Scale.

Microsoft Dynamics 365 Business Central provides the foundation for Accounts Payable.

As payment volumes grow, companies add entities, compliance demands increase, and teams are asked to do more with less; AP complexity can outpace native processes.

Mekorma helps organizations automate payment workflows, strengthen compliance and controls, and manage that complexity without leaving Business Central.

Growth doesn't replace Business Central— it increases the demands placed on AP.

Why Mekorma Matters in Business Central

Mekorma bridges the gap between Business Central's AP foundation and the realities of growth, compliance, and payment complexity.

Business Central Answers

Can we process payments?

Mekorma Answers

Can we scale AP, strengthen compliance, and support growing payment operations without leaving BC?

When to Start the Mekorma Conversation

AP staff spend significant time building payment batches.

Multiple companies or legal entities require repetitive processing.

Vendor compliance and fraud prevention are growing concerns.

Executives need better visibility into payment activity.

Payment processing depends on a few key employees.

AP teams are being asked to do more without adding headcount.

The Partner Opportunity

Many Business Central customers can process payments successfully today.

The question is whether they maintain efficiency, control, and compliance as complexity increases.

Mekorma helps Microsoft Partners address common AP challenges before they become operational bottlenecks. Because it works directly within Business Central, customers gain greater efficiency, stronger controls, and improved scalability while keeping Business Central as their system of record. Partners also benefit from a reliable solution and a collaborative team that is committed to making engagements successful.

Best Fit Customers

Multi-company organizations with complex AP

Shared services environments

High-volume AP teams

Organizations moving away from paper checks

Customers focused on fraud prevention and compliance

Teams looking to scale without increasing AP headcount

The best time to modernize AP is before growth creates bottlenecks.

If a customer matches several of these indicators, it may be time for a Mekorma conversation.
